

What will heaven on earth be like?

- Great quality of life. No person will have to work. We will all be free to pursue the passions of our heart and to express these passions to everyone in our surrounding, local, regional, global.
- AI and technology will be prominent and primary. They will afford the vast majority of mankind the freedom to follow their passions. We will be a cybernated society, but not controlled by machines. They will remain under our control as we focus on exploring the limits of human interactions and feelings through enhanced personal contact.
- Cell phones will be much less prominent. All people will have great TVs and large screened computers to watch all their media on. Cell phones will be primarily for communication.
- No second or third grade product or services. The best of everything - and in greater variety than now present.
- Cleanliness - the world/environment will be returned to pristine and will be maintained this way and enhanced through AI and new technologies.
- Great sex with an infinite number of partners with no worry of disease and no fear of jealousy/repercussions from your significant other (Eternal soulmate)
- Alcohol in many more forms than existing - beers, wines, hard alcohols +++
- Tobacco in many more forms than existing - cigarettes, cigars, pipes, vaporizers +++

What will be missing from heaven on earth?

- No currency of any kind (CAD, USD, Euro, Yen, crypto...)
- No stock exchanges
- No betting, no lotteries, no VLTs
- No forms of psychotropic drugs - no need for these.
- No medical profession - no need - all disease and death are eradicated from the landscape. No drugs of any kind. No need.
- No legal profession, no contracts - no need - evil is eliminated from the world. All of man's efforts will be towards good, wholesome and loving ends. All deals will be made by looking a person in the eyes (the window to the soul) and shaking their hand.
